PROFESSIONAL SUMMARY

Information Systems undergraduate at Addis Ababa University and Junior Full-Stack Developer with hands-on experience building web applications using React, JavaScript, Node.js, Express.js, and MySQL. Built four full-stack projects featuring REST APIs, JWT authentication, and role-based access control. Interested in contributing to development teams, solving real problems, and strengthening my backend skills; also exploring AI/ML and cybersecurity.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, React, Tailwind CSS, Vite, Responsive Web Design

Backend: Node.js, Express.js, REST APIs, Authentication and Authorization

Database: MySQL, SQL

Tools: Git, GitHub, JSON Web Tokens (JWT), bcrypt

PROJECTS

ShegerFlix — Streaming Platform for Ethiopian Movies and Series Live Demo | GitHub

Tech: React, Vite, Tailwind CSS, Node.js, Express.js, MySQL, JWT, bcrypt

- Built a full-stack web application with a React frontend and a Node.js/Express.js REST API backed by a six-table MySQL schema.
- Implemented user registration and login with bcrypt password hashing, JWT authentication, role-based admin access, and request validation with express-validator.
- Developed title browsing, search and filtering, a personal watch list, watch history, and an admin dashboard for managing titles and users.

HireHub Ethiopia — Job Platform for Job Seekers and Employers Live Demo | GitHub

Tech: React, TypeScript, Node.js, Express.js, MySQL, JWT, Google Gemini API

- Developed a job platform with separate student, employer, and admin roles, a nine-table MySQL schema, and role-protected REST API routes.
- Implemented job posting and search, applications with status updates and withdrawal, saved jobs, notifications, employer applicant management, and admin moderation of users, companies, and jobs.
- Integrated the Google Gemini API for AI-assisted CV-to-job matching with a rule-based fallback, and added PDF resume upload and parsing.

Gulit Market — Online Marketplace Live Demo | GitHub

Tech: React, TypeScript, Vite, Tailwind CSS, Node.js, Express.js, MySQL, JWT

- Built a marketplace application with a React frontend connected to a Node.js/Express.js REST API and a 15-table MySQL database.
- Implemented JWT authentication with customer, seller, and admin roles; server-side cart and wishlist; and checkout that creates orders with server-calculated totals (Cash on Delivery).
- Developed seller and admin dashboards for listing management, order tracking, offers, user management, and listing moderation.

TaskForge — Project and Team Management App Live Demo | GitHub

Tech: React, TypeScript, Tailwind CSS, Node.js, Express.js, MySQL, JWT, bcrypt

- Built a Trello/Jira-style application with a React frontend and a Node.js/Express.js REST API backed by a 12-table MySQL schema.
- Implemented JWT authentication, bcrypt hashing, server-side role-based access control (Admin, Manager, Developer), and organization-scoped queries so each organization only sees its own data.
- Developed a drag-and-drop Kanban board, projects, teams, task comments, file attachments, and notifications, and wrote a shell-script API smoke test.

EDUCATION

Addis Ababa University 2023 – Present

Bachelor's student, Information Systems

TRAINING

Evangadi Tech — Full-Stack Web Application Development Nov 2024 – Apr 2025

Udacity — Accenture Programming Fundamentals Nanodegree Completed Nov 8, 2024

Geez Sec — Cybersecurity and Ethical Hacking Training Jan 2024 – Feb 2024
